NICHOLAS B. KLAINE, Editor.

TEXAS CATTLE DRIVE.

The Kaneas City Commercial Indicator eas may be placed at 2:0,000, and, sitting the reports obtained from different sources carefully, it believes that it publishes the list which is the most reliable one that has been yet given. It has often been the case that cattle which would be driven were credited to different parties, as if each would drive, when in reality they would be the same lots. For instance B. would contract with C. to deliver him, say 5,000 head of on the in Kansus. It has been the case that B and C. would both be credited with the same cattle, when in reality C. should only have got the credit of them. In the list which we publish, this error has been avoided and only the proper parties are credited with the number of cattle which they will drive, thus avoiding all doubling.

In regard to the class of cattle which will reach Kansas this summer and what will become of them, it is interesting to know that there will be very few females among them and not more than 12 000 beeves, the la ger portion of the drive being young Texas cattle raisers are now keeping the cowe at home to raise from, and for the herves in Southwestern Texas there is a very good demand for the Havana and New Orleans markets. At least one fifth of the cattle, which will be driven to Kansas, will finally go to Nebraska and others have been contracted for, which will not leave more than 93,000 on the market.

There is no reason to expect better prices than last year, but it is thought that the demand will be more scrive.

In six weeks time it may be expected that esttle will commence arriving at Didge

The Indicator publishes an interview had with Peyton Montgomery, from which we extract as follows:

"How was the winter in south-western

"it was very severe. There was sleet three days to succession, a circumstance that had not occurred for sixteen or seventees Je r. previous."

What is the condition of cattle?"

"Cat e are very poor, and there have been heavy losses in certain portions. Take the cattle as a body and they are poorer than they have ever been herstofore. There is a lack of substance in the grass and a scarcity water in the pastures

"Is there much effort being made to im-prove cat le?"

"Yes! buils are being imported from the North, but they do not seem to thrive well. Two car loads were recently purchased by Capt King, and taken to his ranch, of which all but two died. The reason of this

is that proper attention is not paid to them." LIQUORS tle drive ?"

The drive to Kansas will be about 200,-000. These cattle will reach Dodge City shout the fifteenth of May. The bulk of them, I think, will take the eastern trail by way of Fort Worth. A few will take the western trail. Most of the cattle are young se and two years old. The very few females in comparison with forme years, and very few beever. The females are kept at home to raise the young steers from 1 do not think that more than 12,000 beeves that is four years old and upwards—will be driven. There is a good demand now for beeves for shipment to Havana and New Orleans, and the number, which is used yearly for this purpose, will amount to 50,-600 "

"How will prices run this year?"
"The impression is that prices will run

uch this year as they did last." "Will there be many cattle for the or

market this year ?"

"The probabilities are that there will be

about 90,000 head for the open market. About one-fifth of the drive will go to Nebrasks, and a portion to Colorado

Parties from Medicine Lodge inform us that, notwithstanding the severe winter, the cattle have come through looking unusually well. The low has been hardly anything, some putting it at less than one per The grass is growing rapidly, especially in the canona. The number of head on the ringe is estimated between seventy-five and 100,000 .- [Wichi a Bescon.

THE DEATH BATE OF

Our country is getting to be fearfully alarming, the average of life being lessened every year, without any reasonable cause, death resulting generally from the most insignificant origin. At this season of the year especially, a cold is such a common thing that in the hurry of every day life we are apt to overlook the dangers attending if and often find too late, that a fever or Ling trouble has already set in. Thousants lose their lives in this way every winter, while had Bosshee's German Syrup been taken, a cure would have resulted, and a large hill from a Doctor been avoided. For all disease of the Threat and Lungs, Roshee's German Syrup has proven itself to be the greatest discovery of its kind in medicine. Every Druggist in this country will tell you of its wonderful effect. Over \$50,000 bottles sold last year without a single faiture known. Our country is getting to be fearfully alarmin the average of life being lessened every yes

JUST NOW

Is the time to use that King of Remedies for the Blood and Liver SARSAPARHLIA, DAN-PELION, AND JODIDE OF POTASSIGM. It cares Scrofials, Chronic Rheumatism, and dis-cases of the skin, and Mercurial and Syphilitie affections.

The healing properties of AENICA are con-ceded by all physiciaus. For healing Sores, Elects, Cuts, Burts, Bruises, Frost Bites, Piles and Sorte Eyes, BROWN'S ARNICA SALVE is without a rival.

without a rival.

Nathing Short of Unmistakable Beneats
Conferred upon tens of thousands of sufferers
could originate and maintain the reputation
which AYER'S SARSAPARILLA enjoys. It
is a compound of the best vegetable alteratives
with the loddes of Potassium and Iron, and is
